

Welcome! We'll get started soon...While we wait, share your location in the Zoom chat and tell us how was your day!!

Employee Experience Academy

Topic for today: Installing & Deploying Employee Slate with Moveworks

Safe harbor notice for forward-looking statements

This presentation may contain “forward-looking” statements that are based on our beliefs and assumptions and on information currently available to us only as of the date of this presentation. Forward-looking statements involve known and unknown risks, uncertainties, and other factors that may cause actual results to differ materially from those expected or implied by the forward-looking statements. Further information on these and other factors that could cause or contribute to such differences include, but are not limited to, those discussed in the section titled “Risk Factors,” set forth in our most recent Annual Report on Form 10-K and Quarterly Report on Form 10-Q and in our other Securities and Exchange Commission filings. We cannot guarantee that

we will achieve the plans, intentions, or expectations disclosed in our forward-looking statements, and you should not place undue reliance on our forward-looking statements. The information on new products, features, or functionality is intended to outline our general product direction and should not be relied upon in making a purchasing decision, is for informational purposes only, and shall not be incorporated into any contract, and is not a commitment, promise, or legal obligation to deliver any material, code, or functionality. The development, release, and timing of any features or functionality described for our products remains at our sole discretion. We undertake no obligation, and do not intend, to update the forward-looking statements.

Introduction to Employee Experience Academy

Employee Experience Academy is a series of live, hands-on sessions where the ServiceNow product team demonstrates how to configure the Employee Experience product suite. This includes Employee Center, Now Mobile, Browser Extension, Kiosk, Microsoft 365 integrations, and more, using a real ServiceNow instance. Product experts will lead demonstrations, offer best-practice guidance, and answer questions in real time.

Access Upcoming & Past Sessions on
ServiceNow Community

Introducing ServiceNow EmployeeWorks

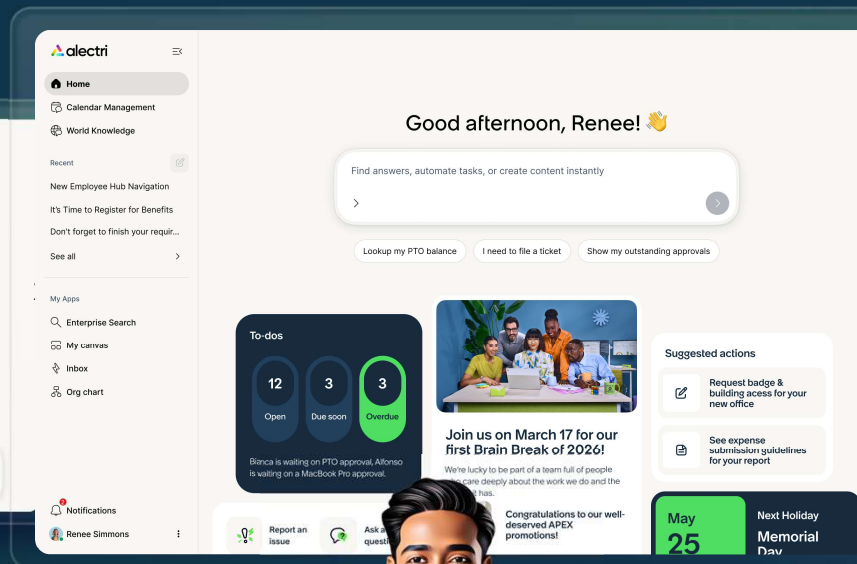

Conversation-first

AI-powered

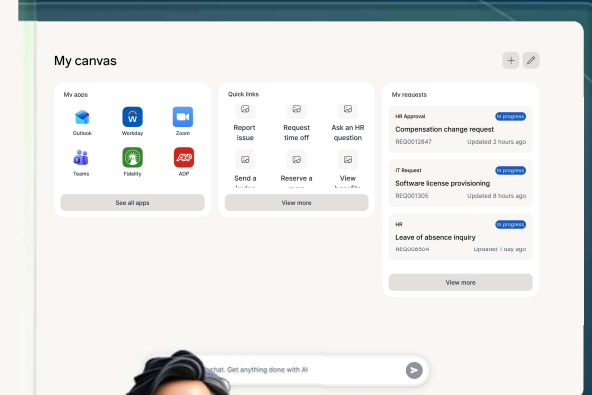

Manager

servicenow

Employee

Hyper-personalized

Business Expert

How to configure **EmployeeWorks**?

ServiceNow EmployeeWorks is a two phase process

Phase 1

Moveworks setup

AI for employees

This phase handles identity, knowledge ingestion, form ingestion, ticket actions, access control, and more to get the AI Assistant fully configured as per needs.

+

Phase 2

Employee Slate setup

New employee experience

This setup helps configure the UI/UX experience layer for EmployeeWorks.

Moveworks platform setup

Phase 1

Set Up Moveworks Before Configuring Employee Slate

Ensure that you've completed these 6 steps for configuring Moveworks before proceeding with Employee Slate configurations –

1. **Establish Moveworks admin access** — portal login and SSO configured
2. **Connect Moveworks to ServiceNow**
3. **Ingest user identity** — employee roster loaded and a service account configured so the AI assistant can identify who it's talking to and route responses correctly.
4. **Index knowledge content** — ServiceNow Knowledge articles ingested into Moveworks search so the assistant can return answers with source citations.
5. **Ingest catalog forms** — ServiceNow catalog forms loaded so employees can find and submit requests through the assistant.
6. **Configure ticketing actions** — file, query, update, resolve, and reopen ticket flows enabled so employees can take action on incidents and requests in-chat.

Moveworks setup Guide:

<https://docs.moveworks.com/ai-assistant/getting-started/labs/moveworks-setup/employee-slate-configuration>

Validate before you continue

Run this checklist against your Moveworks instance before opening the Slate guide

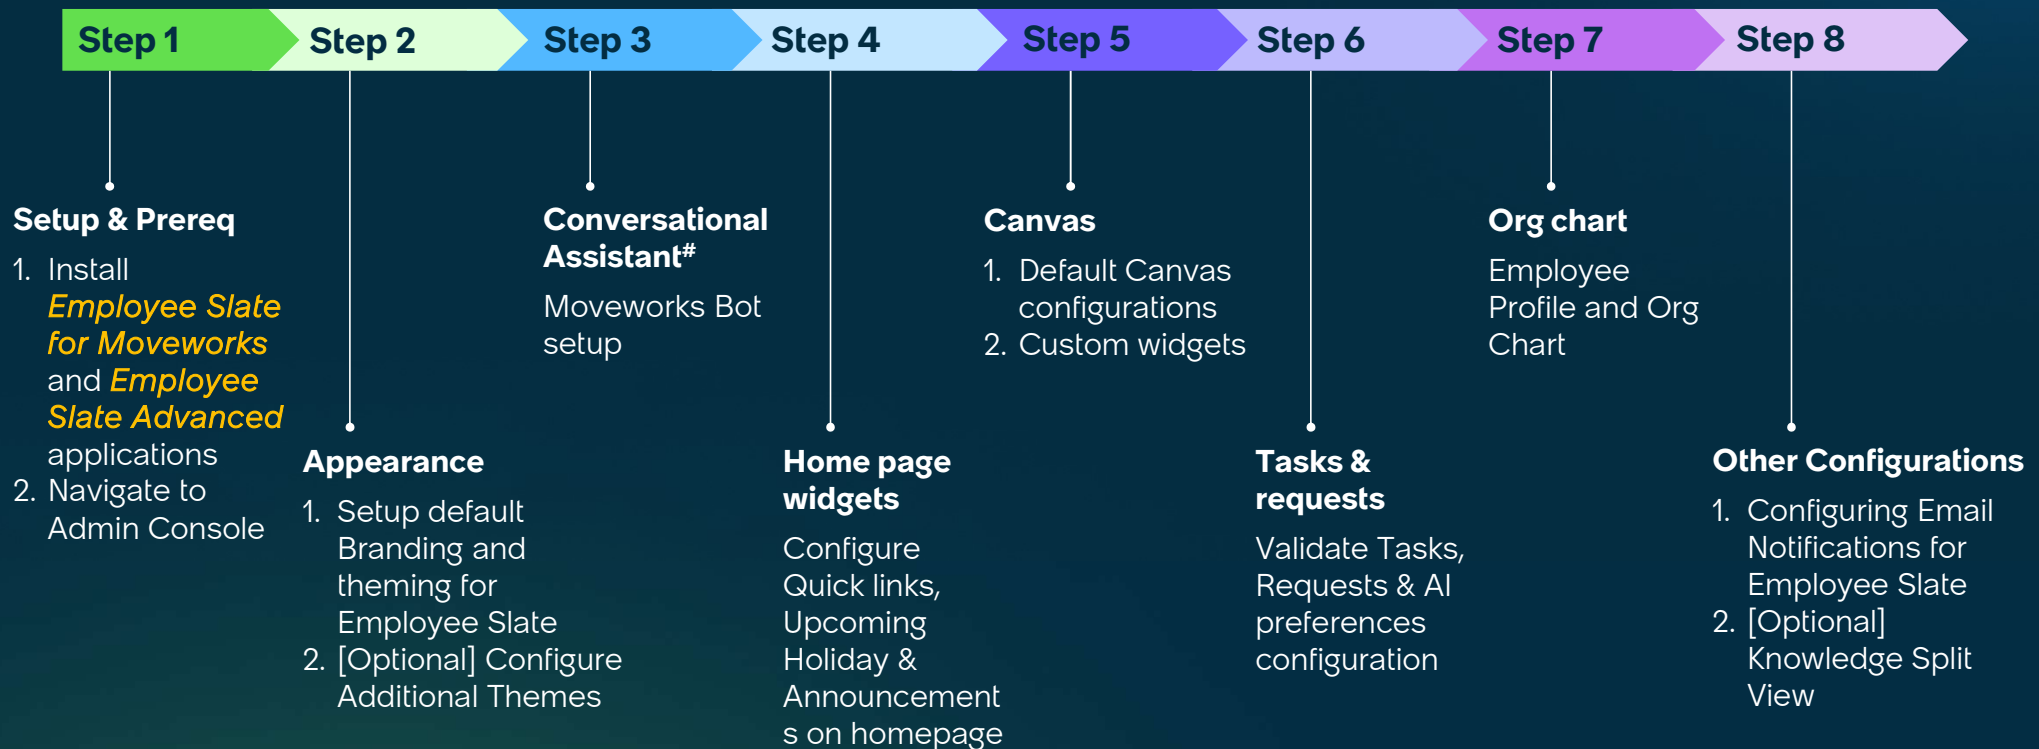

1. Log in to My Moveworks for your tenant (SSO or temporary link)
2. Moveworks Setup loads and navigation modules are visible
3. The snow connector returns a 200 on GET /api/now/table/sys_user
4. Your user appears in Imported Users and Enabled Users is greater than 0
5. A knowledge-base question returns an answer with a source citation
6. Asking for a form (e.g. "I need a standard laptop") surfaces a form
7. File, query, update, resolve, and reopen a ticket all succeed

Employee Slate configuration

Phase 2

Configuring Employee Slate with Moveworks

Eight steps Deployment Roadmap

Step 1: Setup and Prerequisites

1. Prerequisites

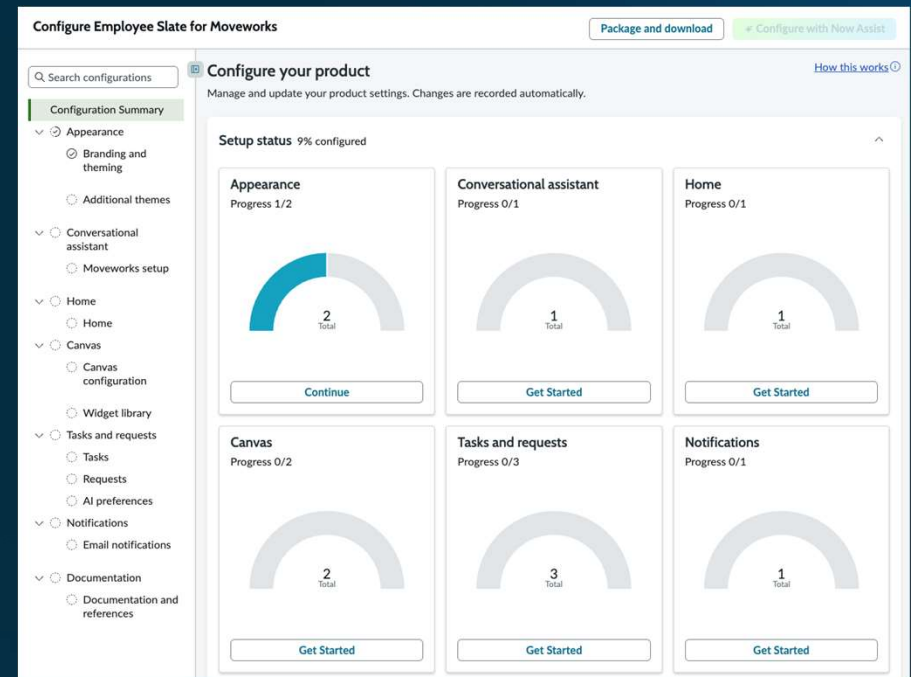

- a) Check your entitlements, family version (Zurich Patch 9+ or Australia Patch 3+)

2. Application Plugins

- a) Install Employee Slate for Moveworks
- b) Install Employee Slate Advanced (If entitled)

3. Admin Console

- a) Navigate to Admin > Admin Home
- b) Setup Admin Console for 'Employee Slate for Moveworks' plugin

Step 1

Step 2

Step 3

Step 4

Step 5

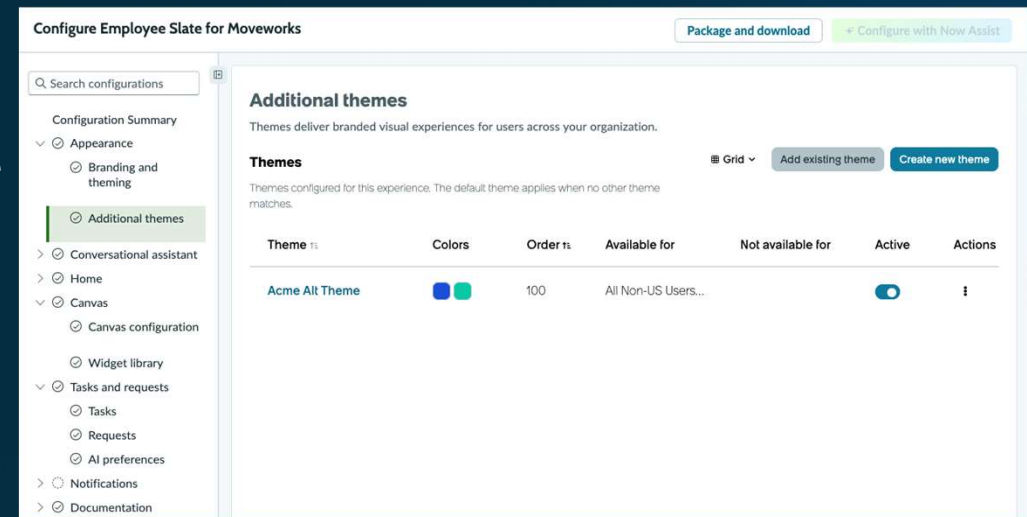

Step 6

Step 7

Step 8

Step 2: Appearance

1. Portal name, URL suffix, logos, favicon, brand colors
2. Preview in desktop/mobile and light/dark mode
3. Additional themes per segment, with priority ordering and fallback defaults
4. Configuration-only — no CSS customization needed or recommended

Step 1

Step 2

Step 3

Step 4

Step 5

Step 6

Step 7

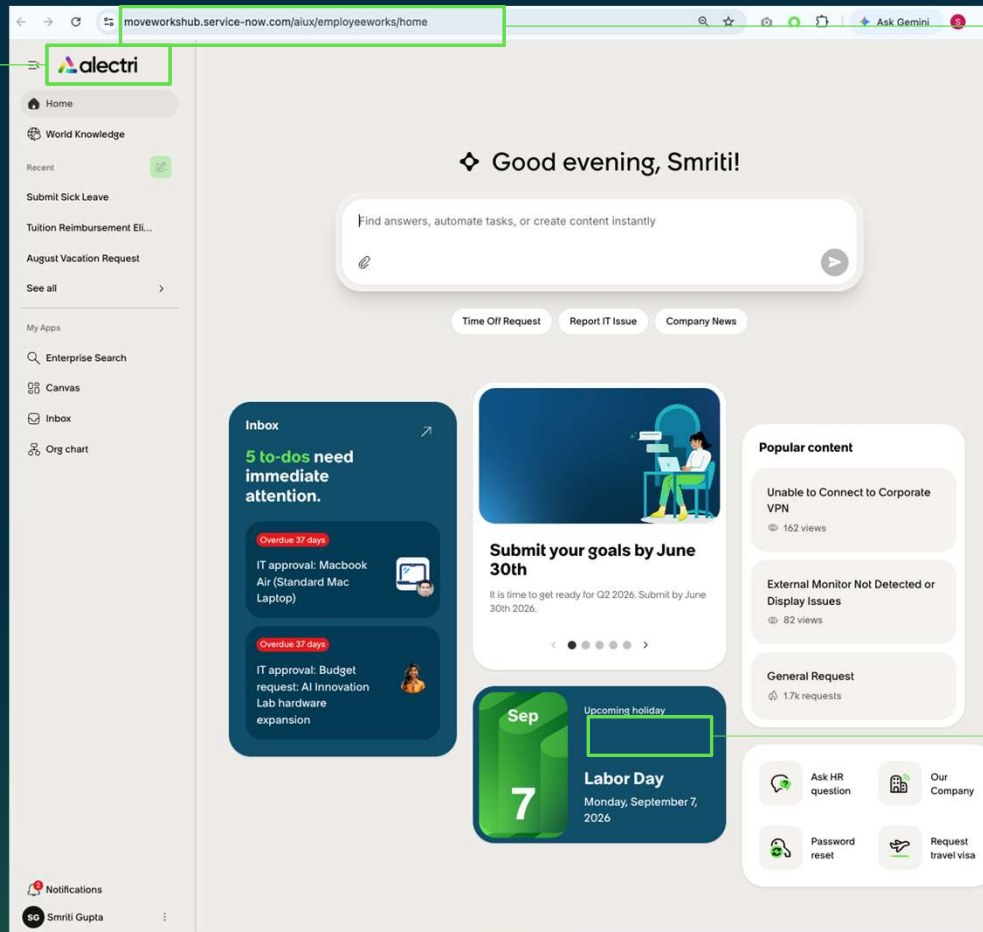

Step 8

Step 2: Appearance

What to expect

Logo, Fav icons
& Light/Dark
mode

Different
themes based
on different
user criteria

URL

Primary color, Accent
color & neutral
palette

Step 3: Conversational Assistant

1. Enter your Moveworks instance URL in the Conversational Assistant module — this links directly to Moveworks Setup
2. SSO (JWT Auth): Create a JWT Auth connection in Moveworks Setup with your ServiceNow instance as both Connector and Trusted Issuer; add up to 4 Suggested Prompts
3. New Bot required: Create a net-new Bot (ChatVar), surface = unified-frontdoor; naming: {org}-employeeworks-webchat
4. Branding (Optional): Update Assistant Name, Avatar, and Logo in Moveworks Setup
5. Enterprise Search, World Knowledge and Notifications are fully configured in Moveworks Setup — no ServiceNow config needed

The screenshot shows the 'Employee Slate' configuration page in ServiceNow. The page is titled 'Employee Slate' and has a subtitle 'Manage authentication and display settings for ServiceNow Employee Slate for Moveworks'. On the left, there is a sidebar with 'Chat Platforms' and 'Employee Slate' (selected). The main content area is divided into several sections:

- Add Universal Assistant Suggested Prompts:** This section allows adding up to 4 prompts. It has a table with columns 'Display Text' and 'Utterance'.

Display Text	Utterance
Get Help	Request a replacement laptop
Find Information	What is the tuition fee reimbursement policy?
Give Kudos	Send kudos to a colleague
Find People	Who is our CFO?
- Connector and Trusted Issuer:** This section explains that it supports multiple ServiceNow instances. It includes a step '1. Select your connector' with a dropdown menu showing 'snow'. Below this is a section 'Add Trusted Issuer' with a text field containing 'https://aixwashington.service-now.com'.

Step 1

Step 2

Step 3

Step 4

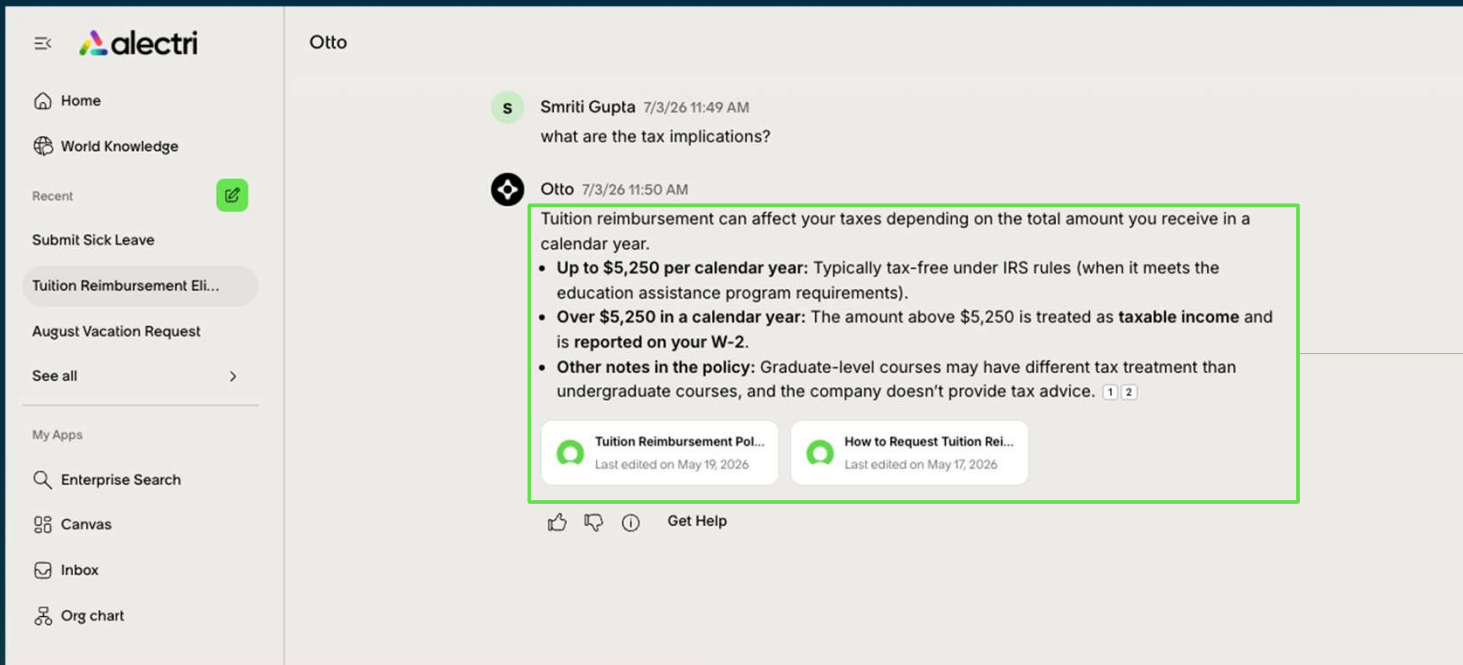

Step 5

Step 6

Step 7

Step 8

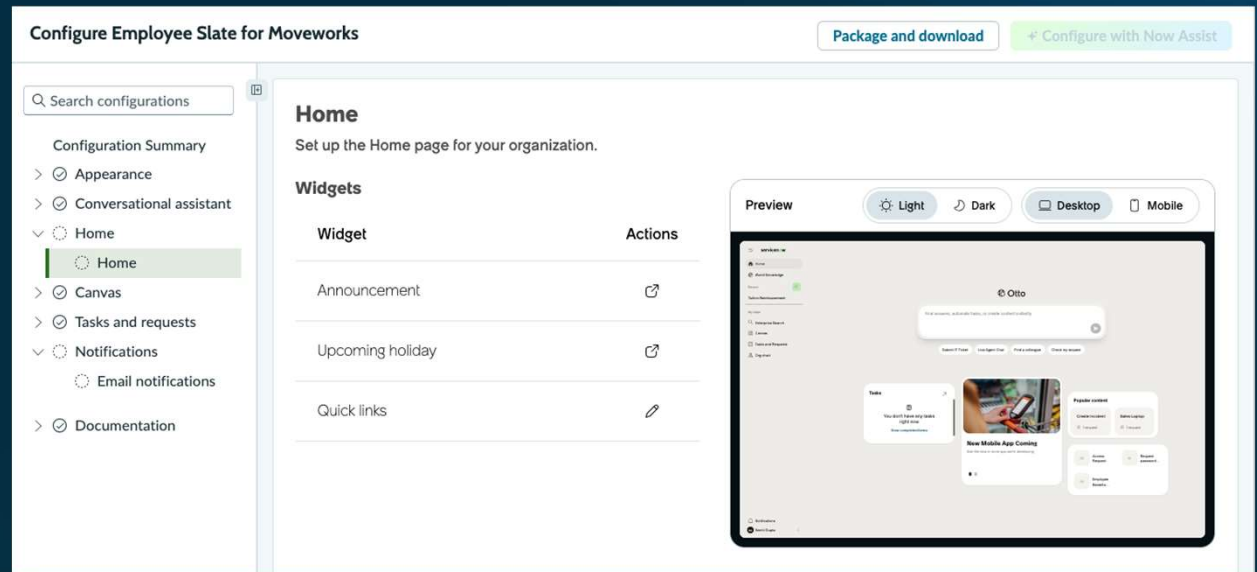

Step 3: Conversational Assistant

Conversational Assistant surfacing relevant responses with KB articles and Catalog items as sources

Step 4: Homepage Widgets configuration

1. Home page configuration is now centralized in the Admin Console — no more platform tables or scripts.
2. Configure Quick Links inline: add, reorder, and delete with drag-and-drop; live preview updates in real time. Max 10 links.
3. Announcements and Holiday Calendar are accessible via direct links in the console.

Step 1

Step 2

Step 3

Step 4

Step 5

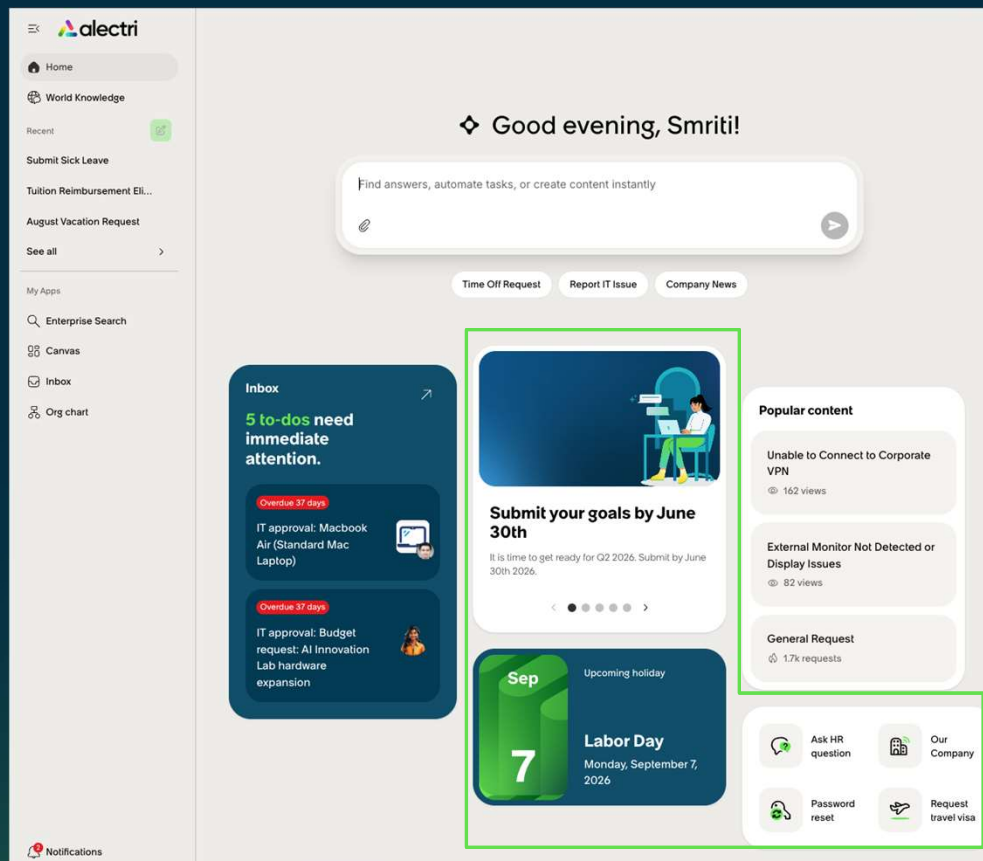

Step 6

Step 7

Step 8

What to expect

Step 4: Homepage Widgets configuration

Announcements, Upcoming Holiday, and Quick links widgets on homepage configured

Step 5: Canvas configuration

1. Set a default subtitle and widget layout for Canvas — employees can personalize from this baseline
2. Preview by Role or User: Trigger a live, read-only preview for any role or individual before publishing
3. Push updates additively: New widgets appear in default positions; employee personalizations are never overwritten. All updates are audit-logged
4. Toggle widget visibility in the Widget Library to control what appears in each employee's available widgets list; edit or create widgets directly from the library

Step 1

Step 2

Step 3

Step 4

Step 5

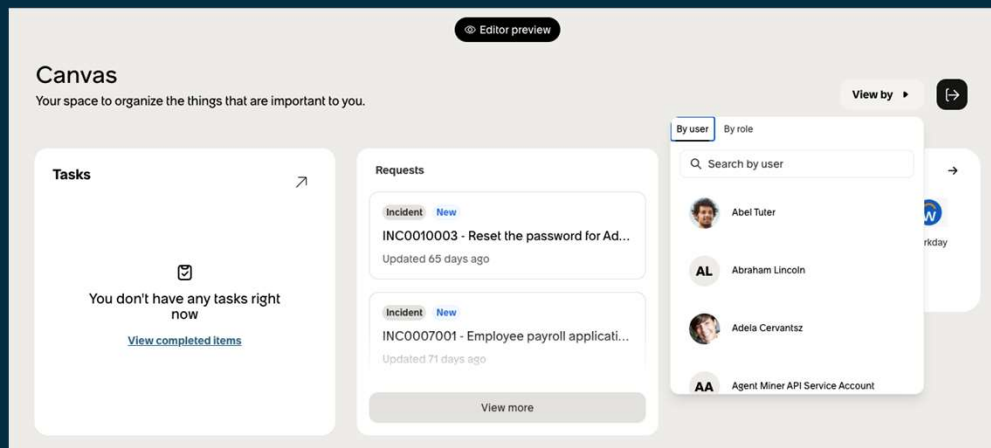

Step 6

Step 7

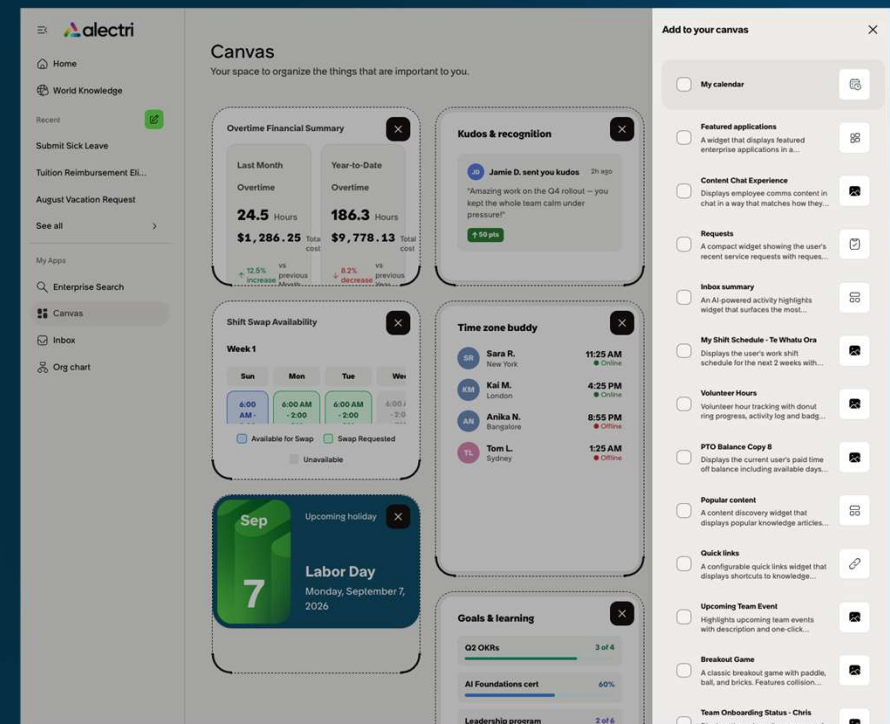

Step 8

What to expect

Step 5: Canvas configuration

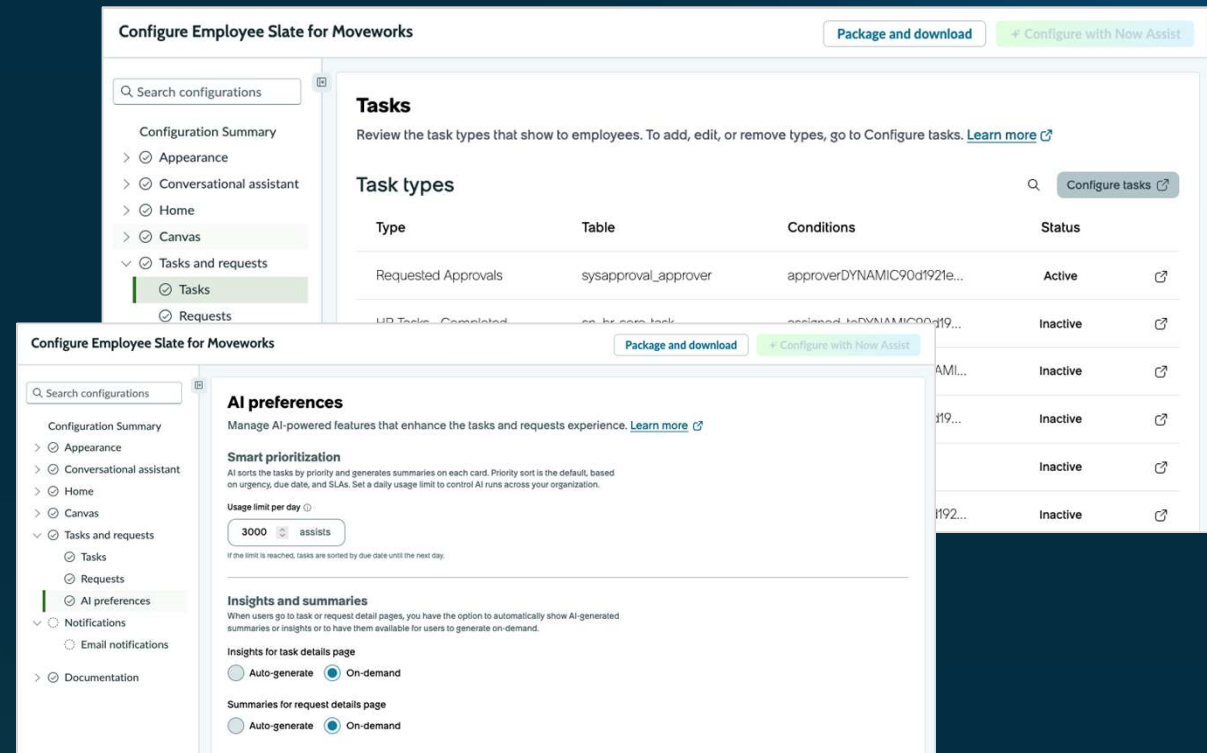

Admins can setup default canvas experience, preview the expected canvas layout for individual users or roles and then publish custom widgets to the canvas library

Employees can view default canvas layout and modify it as per their need

Step 6: Tasks & Requests Validation

1. Tasks tab lets admins review existing task type configurations that appear under the To-dos tab in Inbox.
2. Requests tab provides a review surface for existing request type configurations within Inbox.
3. AI Preferences tab lets admins set the daily limit for assists and control whether AI summaries load automatically or only on user click.

Step 1

Step 2

Step 3

Step 4

Step 5

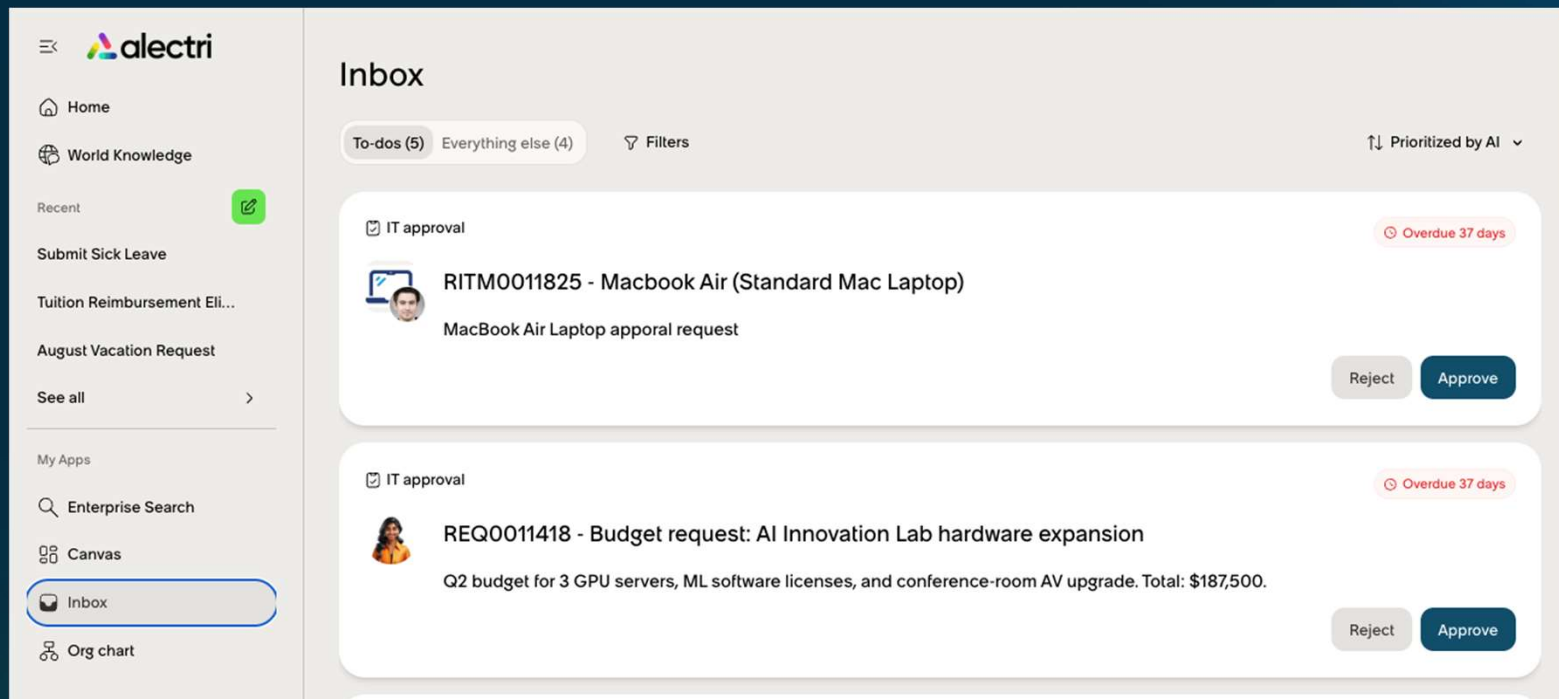

Step 6

Step 7

Step 8

What to expect

Step 6: Tasks & Requests Validation

Employees can view configured Tasks, Requests and approvals in their Employee Slate 'Tasks & Requests' space

Step 7: Employee Profile & Org Chart setup

For organizations that have not yet deployed the Employee Center (Pro) portal:

1. Opt in to the Employee Profile feature to enable the new employee details and design.
2. Create an active employee definition and generate employee profiles.
3. Configure UI elements for the Employee Profile and Org Chart per your organizational preferences.

The screenshot shows the 'Employee Definition' configuration page in ServiceNow. At the top, there's a header 'Employee Definition' with navigation icons and buttons for 'Update with Lens', 'Update', and 'Delete'. Below the header, a message states 'You are editing a record in the Employee Profile application (cancel)'. A blue banner below that says 'Employee Profiles can be generated for active users only.' The main section is titled '* Table: HR Profile'. Under 'Condition', there's a dropdown showing 'No. of records matching the condition: 562' and buttons for 'Add Filter Condition' and 'Add OR Clause'. Two groups of conditions are listed, each starting with 'All of these conditions must be met'. The first group includes: 'User.Active' is true, 'Employment start date' is empty, 'Employment end date' is empty, 'User.Class' is User, and 'External' is false. The second group includes: 'User.Active' is true, 'Employment start date' is not empty, 'Employment end date' is empty, 'User.Class' is User, and 'External' is false. Each condition has a dropdown for the field, a dropdown for the operator, and a dropdown for the value. To the right of each condition group are 'AND' and 'OR' buttons, and a red 'X' button to remove the condition. At the bottom, there's an 'Active' checkbox.

Step 1

Step 2

Step 3

Step 4

Step 5

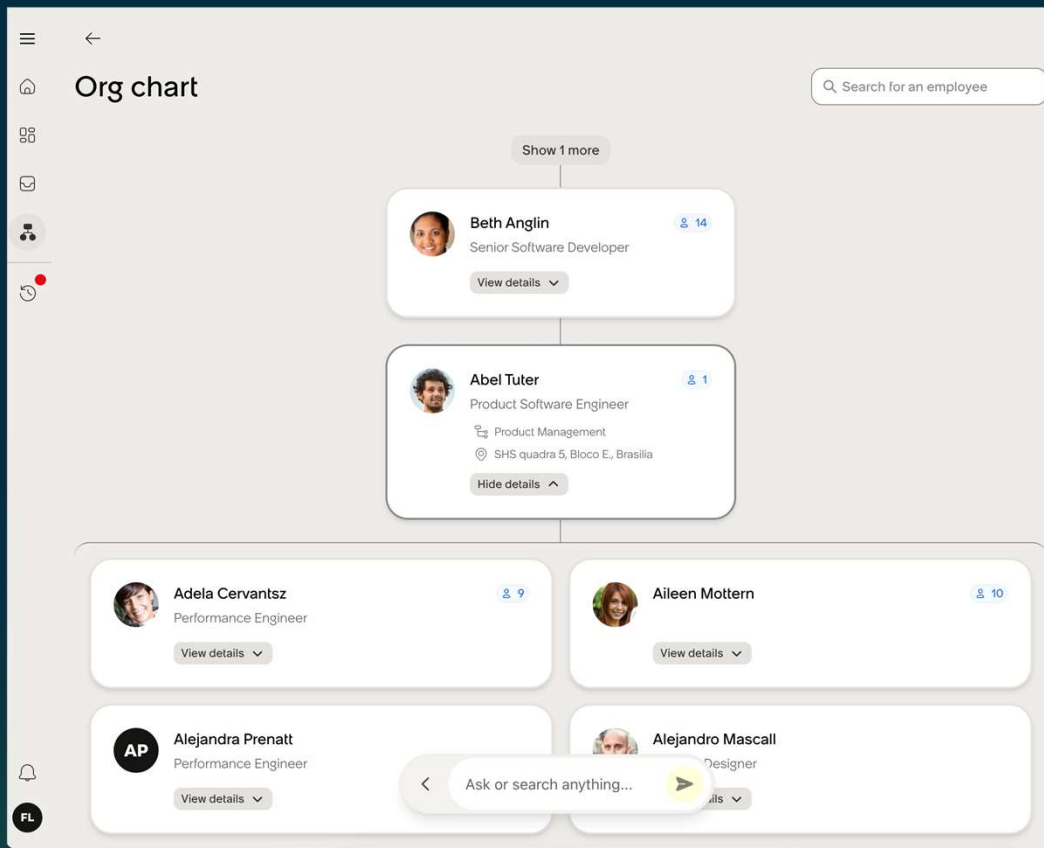

Step 6

Step 7

Step 8

What to expect

Step 7: Employee Profile & Org Chart setup

Employees can view their Employee Profile and Organizational hierarchy

Step 8(a): Email Notifications Configurations

1. 38 notifications → 16 — organized by persona and lifecycle stage
2. Consistent template across all notifications: ticket number, plain-language status, contextual details, CTA, and optional CSAT on resolution
3. AI-native branded design — mobile-responsive, no legacy notifications firing post-consolidation
4. Admins can preview, review, and migrate all notifications to the new template in one click from the Admin Console

The screenshot displays the 'Configure Employee Slate for Moveworks' interface. On the left is a sidebar with a search bar and a 'Configuration Summary' section containing various categories like Appearance, Conversational assistant, Home, Canvas, Tasks and requests, Notifications (highlighted), and Documentation. The main panel is titled 'Email notifications' and includes a summary of existing notifications and a table of configurations.

Email notifications
Your existing notifications are available here. Review and update your email notifications to Employee Slate template.

Needs update (10) Updated (0) Custom (0)

These notifications are active until the update is applied, at which point the new template will replace the existing one.

[Update to Employee Slate](#)

Name	Active	Table	Category	Email template
Request was opened	true	sc_request	Service Catalog	Employee notification template
Request Rejected	true	sc_request	Service Catalog	Employee notification template
Request Item Delivery	true	sc_req_item	Service Catalog	request_item.general
Comment left on request	true	sc_req_item	Service Catalog	Employee notification template
Request approved	true	sc_request	Service Catalog	Employee notification template
Incident resolved	true	incident	IT Service Management	Employee notification template
Incident was opened	true	incident	IT Service Management	Employee notification template
Incident closed	true	incident	IT Service Management	Employee notification template
Request completed	true	sc_request	Service Catalog	Employee notification template
Comment left on incident	true	incident	IT Service Management	Employee notification template

[Mark as configured](#)

Step 1

Step 2

Step 3

Step 4

Step 5

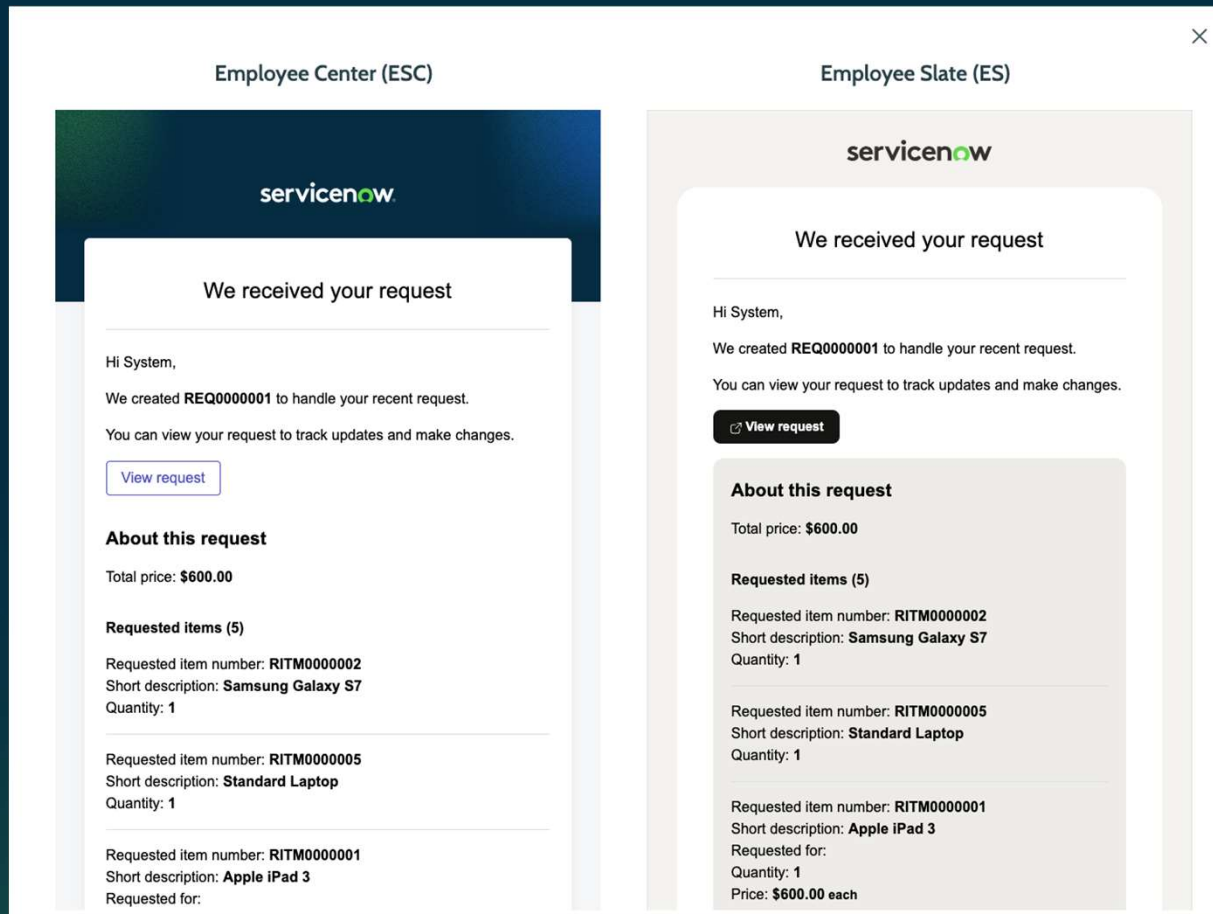

Step 6

Step 7

Step 8

What to expect

Step 8(a): Email Notifications Configurations

Streamlined and consistent email notifications with AI-native branding

[Optional] Step 8(b): Custom Knowledge in split view

1. Required only for custom knowledge configurations — customers on standard KB setup can skip this step
2. Without this rule, Moveworks chat links bypass split view and break the in-portal experience
3. Configure the AIX URL Rewrite Rule at sys_aix_url_rewrite_rule_list.do — map your custom portal page and sys_id field to the /knowledge/:sys_id AIUX page
4. Verify post-save: click a knowledge article from Moveworks chat and confirm it opens in split view within Employee Slate

The screenshot shows the ServiceNow 'AIX URL Rewrite Rule' configuration page. The interface includes a top navigation bar with 'servicenow', 'All', 'Favorites', 'History', and 'Admin'. A search bar and a 'Search' button are also present. The main configuration area is titled 'AIX URL Rewrite Rule' and contains the following fields:

- * Source type: Processor (dropdown menu)
- * Processor: kb_knowledge (text input)
- Experience: (text input with a search icon)
- Parameter mapping: sys_id (text input) and article_id (text input)
- Application: AI Experience Framework Components (dropdown menu)
- * To AIUX Page: /knowledge/:article_id (text input)
- Order: 100 (text input)

At the bottom of the configuration area, there are buttons for 'Update with Lens', 'Update', and 'Delete'.

Troubleshooting Guide

Employee Slate Behavior Troubleshooting quick reference (1/2)

Symptom	Likely cause	Fix
Getting this error – 'Read operation on table 'sn_hr_core_case' from scope 'Employee Slate Core' was denied.'	RCA's need to be approved	• Navigate to System Application > Application Restricted Caller Access • Look for records for "Read" operation, Source Scope "Employee Slate Core" and allow them
Can't see the Employee Slate for Moveworks plugin in Application Manager	Check prerequisites and Sync issue in the library	Ensure that your family version is compatible and 'Sync' the application manager. Wait for a few minutes before checking again.
Can't see 'Manage your products' under Admin Home	Now Assist for setup missing	Now Assist for setup might be missing in your instance – raise a support ticket for troubleshooting
Getting 'Failed to load widget' error in admin console	Plugin error	Repair the 'Employee Slate' plugins that you are working with and check again after few minutes
I don't see the homepage widget configuration module within Admin console	Need to update the plugins	Ensure that your plugins are updated to the latest July release versions

Employee Slate Behavior Troubleshooting quick reference (2/2)

Symptom	Likely cause	Fix
I've added upcoming holidays in the configuration table but my users don't see that on the homepage widget	Geographical location not set	• Ensure that you've selected a country while adding a holiday instead of the default 'System (US)' • Make sure that the country matches with the user profile record
My Content team do not see the front-end authoring menu 'Communication/Announcement'	Check the role	Ensure that your content teams have the sn_cd.content manager role
My users don't see the custom widget in their canvas library	Role access and widget visibility check	Ensure that the custom widget is set for 'Employee Visibility=True' and the end user is included in the role configured for that widget
I don't see the org chart and Employee Profile	Setup missing for Employee profile	Ensure that you've set up your employee definition and opted-in for Employee Profile
The KB articles are surfacing in the chat but opening in a new tab in Employee Center view	The KB article view must be having custom knowledge configurations	Need to setup AIX URL rewrite rule

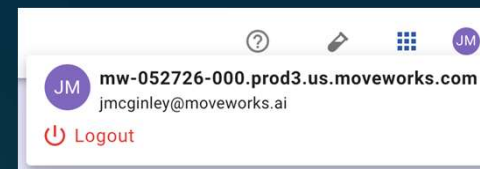

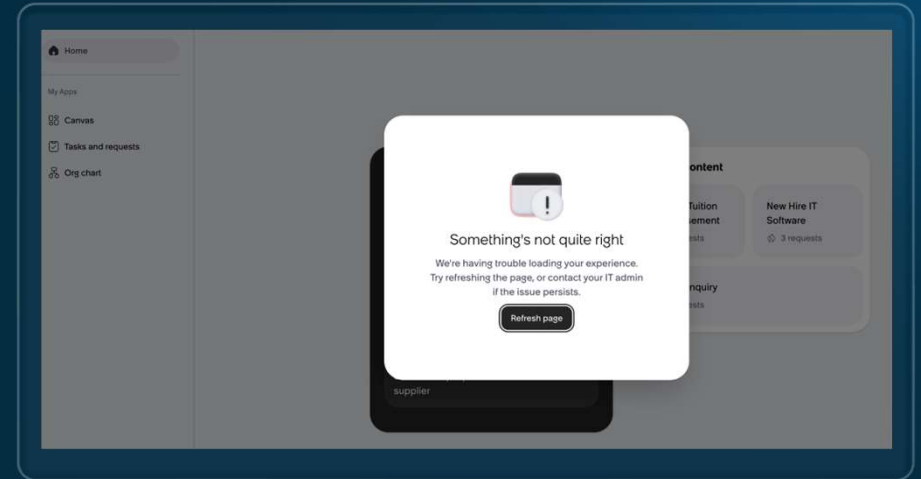

Moveworks Behavior Troubleshooting quick reference

Symptom	Likely cause	Fix
Slate doesn't return answers	Incomplete config, or KB article indexing still ingesting	Re-run the Moveworks validation checklist
Can't file or query tickets	Core Ticketing configurations within the Moveworks setup not configured or misconfigured	Re-validate ticket actions in the AI Assistant
Doesn't recognize the employee	User Identity & Service Account setup is misconfigured	Confirm user in Imported Users; check Enabled Users
Form found but won't submit	sc_request Create action not enabled	Verify Table Mappings for sc_request and sc_req_item
KB article not surfacing	Permission or ACL mismatch	Ingestion check, then access strategy, then isolation test
A feature flag isn't visible	Managed by Moveworks, not lab-configurable	Contact your Moveworks account team

EmployeeWorks Web Interface Troubleshooting

If you encounter an error when accessing the EmployeeWorks Web Interface, please review the setup guide again and verify the following configurations:

- User Connectivity: Ensure the test user can successfully communicate with Moveworks via Moveworks on Web.
- Moveworks Setup:
 - Employee Slate: Confirm that the configuration has the correct ServiceNow (NOW) connector and URL.
 - Manage Chatbots: Verify that you have added the Unified-Frontdoor value.
 - User Identity: Confirm that your test user has a valid ServiceNow identity linked to the active Slate connector.
- ServiceNow Employee Slate for Moveworks Configuration:
 - URL Match: Double-check that your configured URL exactly matches your Moveworks URL.

Employee Slate validation checklist

Area	What to check
Home page	Branding, colors, suggested prompts, and banners appear correctly
Conversational AI	Bot responds; requests create tickets; people search returns cards
Tasks & requests	Approvals appear; Incidents, HR Cases, and Requests are listed
Canvas	Default layout is correct; employees can personalize widgets
Org chart	Profile cards open correctly; manager hierarchy is accurate
Packaging	Export the update set; import lower-to-production only

servicenow.

Thank you

We appreciate your time. Looking forward to seeing you again next month!
